PROFESSIONAL SUMMARY

Senior Frontend Engineer with 4 years of progressive, hands-on experience building high-performance B2B and civic web platforms across startup, government, and product environments. Specialises in React, TypeScript, and Next.js with a proven track record of leading frontend architecture from inception to production — achieving a 35% page-load improvement on a B2B SaaS platform and reducing codebase duplication by 25% through scalable component systems. Experienced technical lead who has owned the full frontend roadmap, integrated complex REST APIs, and mentored 150+ developers across three consecutive Genesys Tech Hub cohorts.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Lloydant Business Services

Apr 2025 – Present | Enugu, Nigeria — B2B Fintech SaaS

- Architect and deliver end-to-end React and TypeScript features for a data-heavy fintech dashboard serving 8,000+ monthly active business users with sub-2s page load across all major breakpoints.
- Established a design system of 40+ reusable components with full Storybook documentation, cutting UI implementation time by 30% and eliminating 12 recurring design-inconsistency bugs.
- Built and integrated 6 RESTful API modules with backend engineers, including real-time transaction feeds via WebSocket, reducing data-refresh latency by 60%.
- Introduced GitHub Actions CI/CD pipelines for automated linting, testing, and Vercel deployment — reducing manual release time from 3 hours to under 15 minutes per sprint.
- Lead weekly engineering syncs, define sprint frontend scope using Agile/Scrum methodologies, and conduct code reviews across a 4-person cross-functional team.

Lead Frontend Developer | Aono Labs

Jul 2023 – Mar 2025 | Remote — B2B E-commerce Platform

- Spearheaded frontend development of a Next.js B2B marketplace from zero to production, improving page-load performance by 35% through code splitting, image optimisation, and SSR tuning — resulting in a 25% uplift in user engagement within 90 days of launch.
- Designed a scalable component architecture using Redux Toolkit and Context API, reducing code duplication by 25% and enabling junior developers to ship new features with minimal guidance.
- Defined the platform-wide frontend technical roadmap and established UI/UX standards adopted across all product verticals, improving cross-team development consistency and velocity.
- Conducted systematic performance audits using Lighthouse and Web Vitals, identifying 9 critical bottlenecks and driving Lighthouse score from 61 to 94 across core product pages.
- Mentored 2 mid-level developers through structured code reviews and pair programming sessions — both received promotions within 12 months.

Frontend Developer | Enugu State Tech Hub

Sep 2022 – Jun 2023 | Enugu, Nigeria — E-Governance Platforms

- Collaborated with a cross-functional team of 8 to build full-stack e-governance applications using React, Node.js, Express, and PostgreSQL, reducing manual processing time for government staff by 30%.
- Delivered the citizen-facing portal for enugustate.gov.ng, providing public access to 20+ MDA services with fully responsive, WCAG-compliant interfaces.

- Wrote comprehensive unit and integration tests using Jest and React Testing Library for public-facing financial workflows, reducing production bug rate by 45% over 4 months.

SKILLS AND CORE COMPETENCIES

Core: React, Next.js, TypeScript, JavaScript (ES6+)
Styling: Tailwind CSS, Styled Components, CSS3, HTML5
State: Redux, Redux Toolkit, Context API
Tools & Infra: Node.js, WebSockets, Git, GitHub, GitHub Actions, REST APIs, Vercel
Testing: Jest, React Testing Library, Unit Testing, Integration Testing
Process: Agile, Scrum, Code Review, Technical Roadmapping, Storybook, Figma

FEATURED PROJECTS

The Prep Time | staging.thepreptime.com | React, TypeScript, OpenAI API

- AI-powered exam preparation platform that tailors study content to individual student curricula by age and academic level. Integrated adaptive learning algorithms, interactive practice modules, and a performance-tracking dashboard — achieving 1,200+ active student users in the first month post-launch.

Enugu State E-Governance Platform | enugustate.gov.ng | React, Node.js, PostgreSQL

- Public-facing portal consolidating 20+ Enugu State MDAs into a unified citizen services hub. Delivered fully responsive, accessible interfaces that reduced in-person service queues by an estimated 30% within 3 months of deployment.

VOLUNTEER AND COMMUNITY

Frontend Development Mentor — Learnable Programme | Genesys Tech Hub

Nov 2023 – Present

- Mentor 50+ aspiring frontend developers per cohort annually across 3 consecutive years (2023, 2024, 2025), covering HTML, CSS, JavaScript, and React through structured weekly sessions.
- Designed interactive workshop curricula addressing closures, async patterns, and component thinking — consistently rated 4.9/5.0 by mentees across all cohorts.

Learning Facilitator — Codeville Internship Programme | Genesys Tech Hub

Aug 2023 – Sep 2023

- Introduced children aged 10–16 to web fundamentals through project-based learning, with 90% of participants completing their first functional webpage by end of programme.

EDUCATION

B.Sc. Computer Science | Enugu State University of Science and Technology

Nov 2018 – Aug 2022
